

# QUIZ

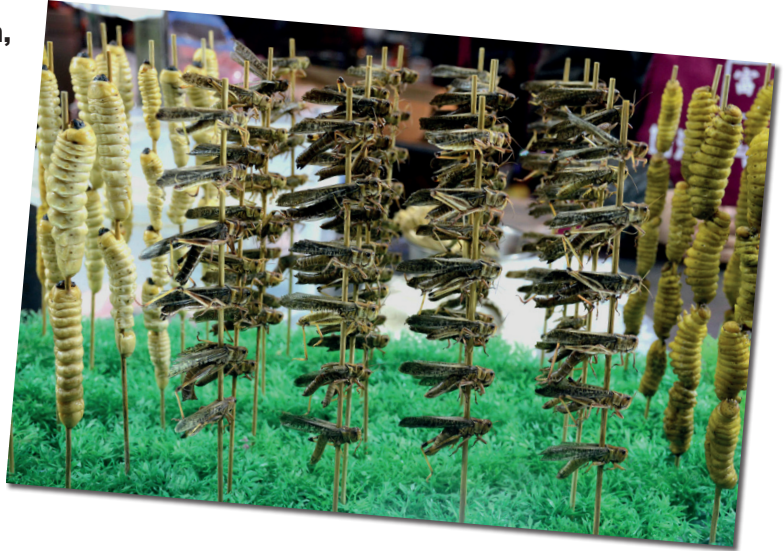

## WHY AREN'T WE EATING INSECTS?

Fill the gaps with what Laurence Mohan, the co-founder of Horizon Insects, says.

So these are called Tenebrio molitor ... they're small **1.** \_\_\_\_\_ and these are some of the most common insects used in **2.** \_\_\_\_\_ insect eating. The vegetables that we use are from local shops so anything that **3.** \_\_\_\_\_ we take and give to our insects.

The **4.** \_\_\_\_\_ that they have is **5.** \_\_\_\_\_ not conventional ... obviously you don't find insects so much in mainstream cuisine in the West.

The smaller mealworms have like a **6.** \_\_\_\_\_ taste, the larger mealworms have a **7.** \_\_\_\_\_ of chicken almost, but they also have a kind of an **8.** \_\_\_\_\_ flavour.

Answers : 1. mealworms - 2. mainstream - 3. goes to waste - 4. flavour (U.S. flavor) - 5. kind of - 6. nutty - 7. texture - 8. almondy
